

QUESTION

Is there a way to automatically package a Revit model and its links to send to a consultant?

ANSWER

Yes, there is! Use **eTransmit**. In a single step, eTransmit can also purge unused items and remove views to reduce model size.

File	Architecture Struc	ture	Steel Preca	st Systems	Insert	Annotate	Analyze	Massing & Site	Collaborate	View	Manage	Add-Ins
\square	P	Help	AXXAN	RFA								
Modify	Transmit a model	About	Import Form to RVT	t Convert RFA to FormIt	÷							
Select 🖣	eTransmit		Formi	Converter								

STEPS

- Close all open projects! You cannot e-transmit your open project.
- Navigate to the Add-Ins menu and find "Transmit a model"
 - o You may need to hide the "Recent Files" page to display Revit's menus
- Select the file to transmit
- Select a folder to save the package
- Choose from various options
- Click Transmit Model when done.

Notes

- eTransmit is built into Revit 2019 and later versions.
- It may take a few minutes for eTransmit to complete.
