

OVERVIEW

The Plumbing Fixture Library is a collection of Revit families designed to provide the **variety and flexibility** which is missing from the default Autodesk libraries. They are flexible enough to meet your needs and designed to be easy to use with various type and instance parameter so they can be representative of fixtures from various manufacturers.

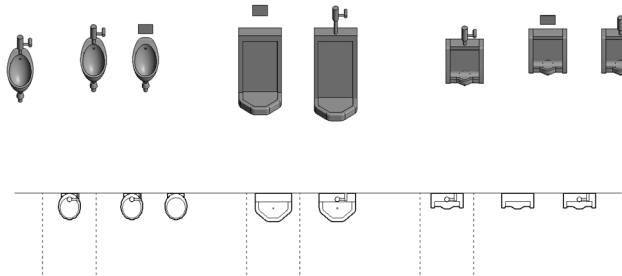

TOILETS

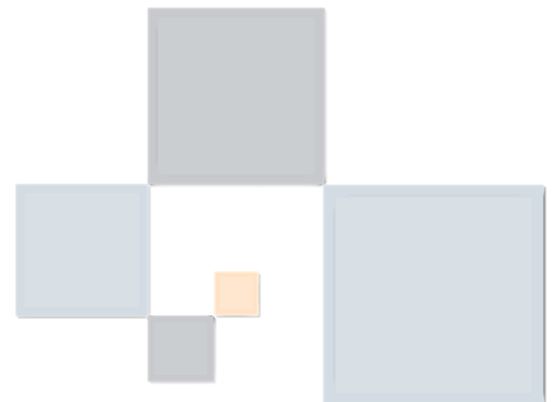

5 Families with options for Seat Height, Tank/Exposed/Concealed Valve, and material. They also include the option to display clearance lines.

URINALS

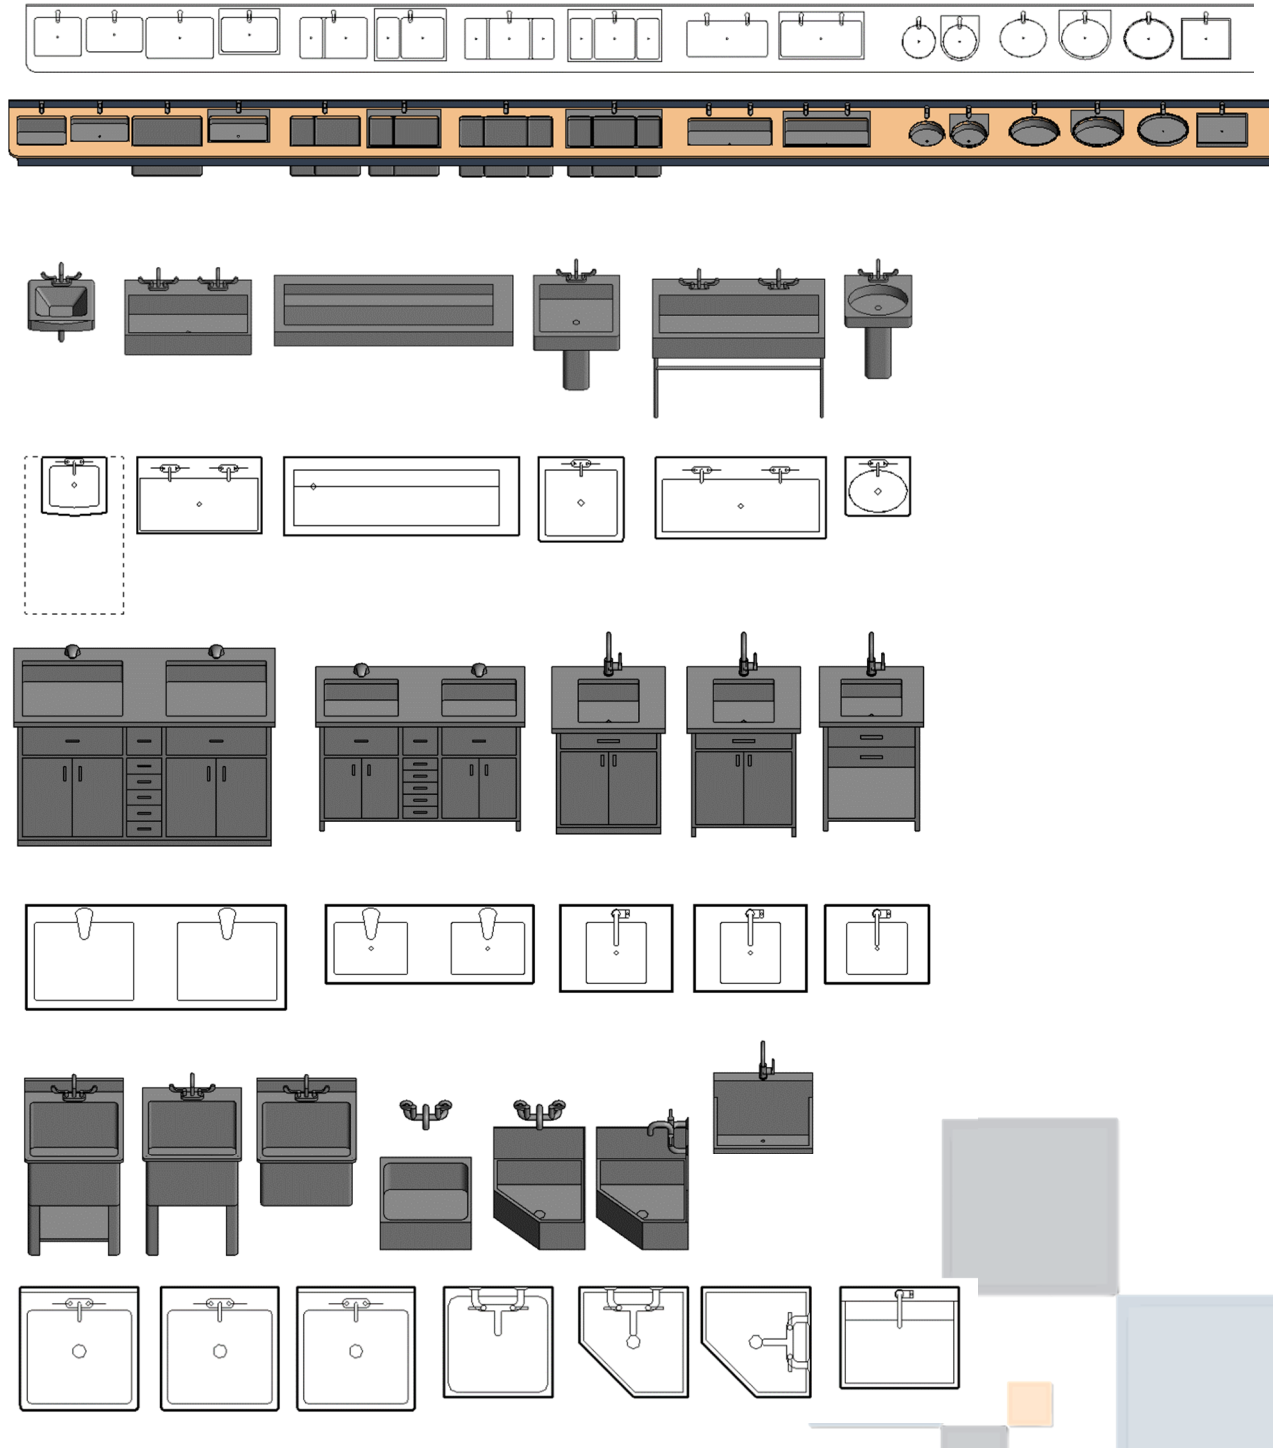

3 Urinal Families with Options for Seat Height, Exposed/Concealed Valve, and material.

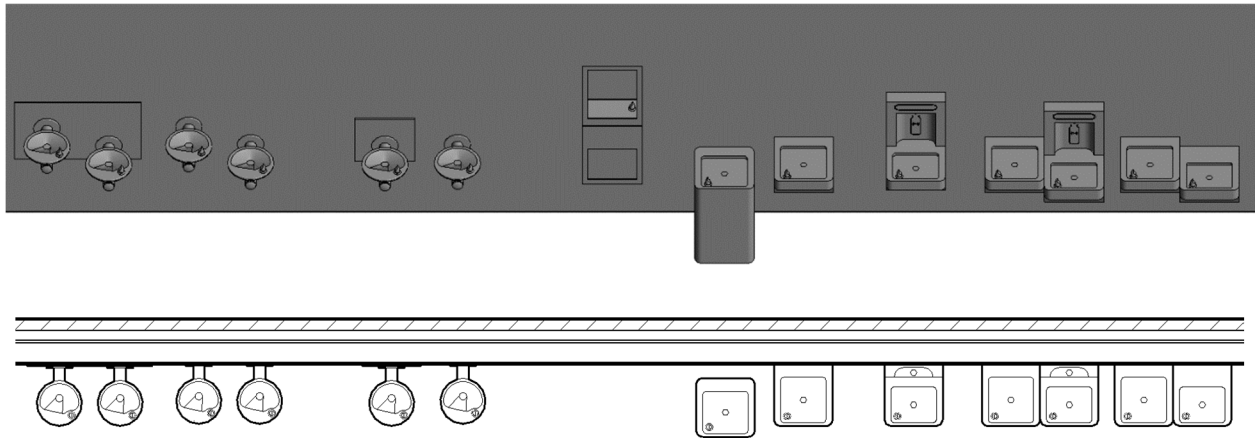

SINKS

We have 21 Sink families including wall mounted sinks and countertop sinks.
 Counter sinks are "face based" families and will automatically cut counters when placed.
 Counter sink graphics can be adjusted to display as Drop in, or Undermount.
 Sinks also has Selectable Faucet options.

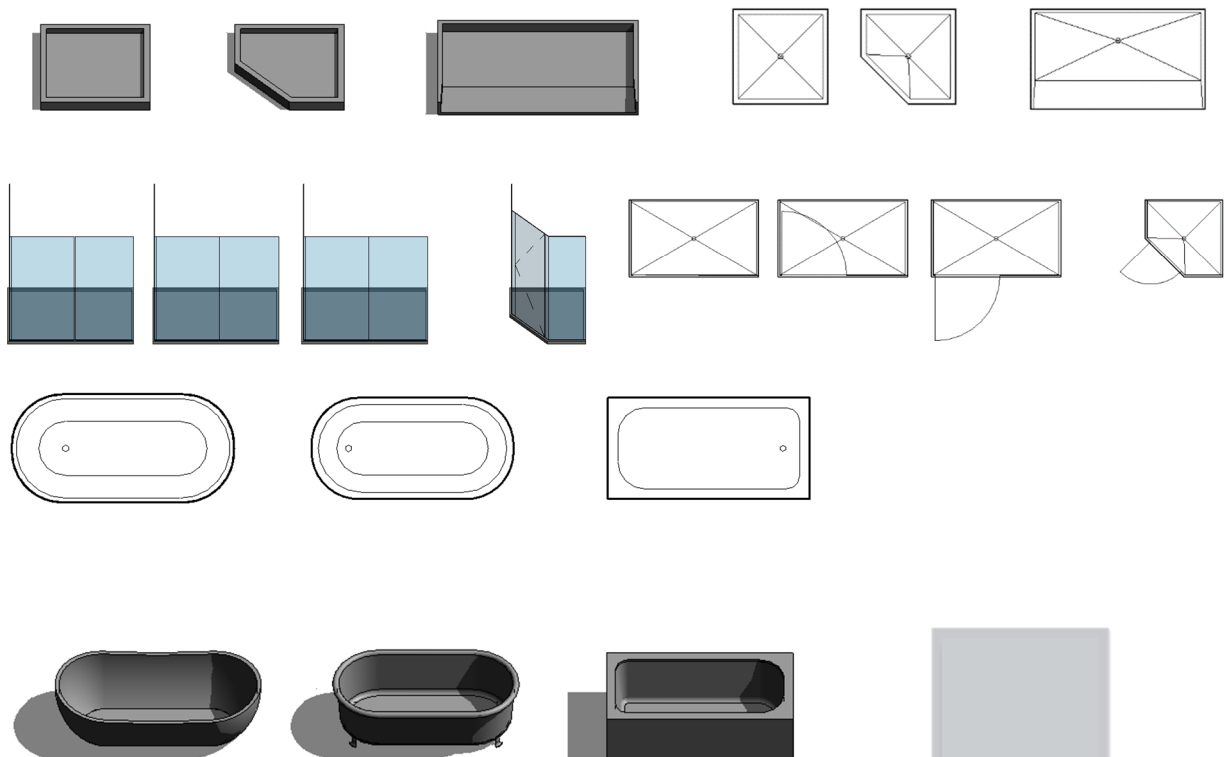

FOUNTAINS

7 Families with options for either a left- or right-hand spigot.

BATHS/SHOWERS

5 Shower Families & 3 Bathtub Families
